SECURE E-MAIL AND DATA

your safety /

People spend increasingly more time on the Internet and supply more and more personal and sensitive data through the Internet. Society is on the verge of the fourth industrial revolution with data playing the leading role. What do e-mail client, server, application and social media operator knows about us? How can they use or misuse the data? These questions currently make the world go round.

the solution /

If you are sending anything by an e-mail, you would not write onto a postcard, encrypt it. The Talkey unique encryption tool will secure your communication. An encrypted e-mail travels through the web as a nonsensical cluster of characters and it is only decoded in the addressee's device. Talkey allows the sender to destroy the e-mail at any time or define the maximum number of times the e-mail can be opened, after which it will be deleted.

97 %

of organizations are not prepared for cybernetic threats related to data leakage

150,000 +

encrypted e-mails sent every day thanks to Talkey

YOU WILL NOT RECEIVE FRAUDULENT E-MAILS

Talkey will not let fraudulent e-mail, asking the recipient to enter personal and login information in a fake page, pass through.

THE SENDER IS INDEED THE PERSON THEY CLAIM TO BE

You can always be 100% sure that the sender is the person they claim to be and that the content of their e-mail has not been tampered with.

NOBODY ELSE READS YOUR E-MAILS

If you encrypt your communication, you know that your e-mails, which often include sensitive and personal information, are not read even by a curious mail server administrator.

YOU CAN REALLY DELETE A SENT E-MAIL

Who has never sent an e-mail to someone else by mistake? Removing a message from a regular e-mail client is not enough. With Talkey you can delete a message directly in the recipient's mail box.

PROTECTION

from the disturbing effects of the online world

COMPLIANCE

with legal requirements

PREVENTION

of human error and negligence

ette

Talkey

a member of ette

ette is a purely Czech-owned group that invests with a higher meaning. It finances and manages projects in four sectors: services, technology, sustainability and lifestyle, building on a common foundation: innovation. The group companies received the Olomouc Region's Award for Environmental Contribution and an award in The Best 100 Czech contest for their innovative approach to sustainability. The ette group has been operating on the Czech market for more than 20 years, employs more than 200 people and has expanded to more than 20 countries.

about the company/

Talkey is a software company with a long tradition on the Czech IT market. It focuses on solutions for secure communication, protection of confidential and secret information and protection of personal data on legislative grounds. Talkey cooperates with security forces and both government and private entities.

people/

Experienced and hard-working people play a key role in each of our projects, and each project is backed by a story that determines the key values for our work. We see the higher meaning of the Talkey encryption tool in protecting individuals and companies against disruptive effects of the online world.
